McGraw Communications Selects PanTerra Networks to Bring Cloud-based Unified Communications to Market

*Agreement puts Cloud-based Unified Communications into the hands of McGraw
Communications' Extensive Direct and Channel Sales Organizations*

SUNNYVALE, CA, December 23, 2010 -- PanTerra Networks (www.panterranetworks.com), the leading provider of cloud-based Unified Communications solutions for small and mid-sized enterprises, announced today that it has signed an agreement with McGraw Communications, a leading competitive local exchange carrier and provider of voice, data and Internet services since 1996 to offer a private branded version of WorldSmart, PanTerra's cloud based unified communications service offering. The relationship will bring the latest innovations in cloud-based communication services to McGraw Communications' product umbrella and allow WorldSmart to be sold through all of McGraw Communications channels.

PanTerra's WorldSmart all-in-one cloud-based unified communication service maximizes a business's responsiveness, driving sales, productivity and customer satisfaction and includes unlimited business voice, unified messaging, fax, instant messaging (IM), email, file transfer, mobile text messaging and presence. In addition, the service includes group communications and collaboration services such as desk sharing, remote desktop access, web conferencing, IM conferencing and audio conferencing.

PanTerra's EVP of Sales and Marketing, Anthony Gioeli said, "Through our interactions with McGraw over the past couple of months, we have been impressed with their relentless focus of providing quality solutions that enable their clients to be more competitive and responsive. WorldSmart enables McGraw to offer all the benefits of cloud-based unified communications with the reliability and innovative feature set expected from their customers. We are excited to open this new channel with McGraw for the delivery of PanTerra services."

About McGraw Communications

McGraw Communications is a leading provider of voice, data and IP communications technologies and solutions to business enterprises nationwide and globally. Founded in 1995, McGraw has been operating as long as or longer than any other competitive local exchange carrier in business today. Thousands of businesses large and small depend on McGraw to be their single point of contact for the technologies and solutions powering their critical communications infrastructure.
